

A E DRILLING SERVICES, LLC MAJOR PROJECT SUMMARY

<u>CLIENT</u>	<u>AMOUNT</u>	<u>SCOPE OF WORK</u>
Shaw Air Force Base Sumter, South Carolina	\$1,750,000	Double cased mud rotary monitoring and extraction wells to 300 feet, pump testing, Geoprobe testing, sparge well installations.
Bluff Road Superfund Site Columbia, South Carolina	\$500,000	Eight-inch stainless steel mud rotary extraction wells, monitoring and injection wells, Geoprobe.
Medley Farms Superfund Site Gaffney, South Carolina	\$500,000	Single and double cased bedrock extraction wells to 250 feet, monitoring wells, packer testing, Waterloo multi-zone installations, rock coring.
Ashland Chemical GA, SC, NC	\$600,000	Saprolite and deep bedrock monitor and extraction well installation, coring, packer testing.
Eglin Air Force Base Fort Walton Beach, Florida	\$300,000	Monitoring well installation, ATV access, Level C Health and safety.
Dam Studies North and South Carolinas	\$1,500,000+	Mud rotary soil test borings, piezometers, rock coring, cone penetration testing, cross hole seismic testing using track equipment on dam faces, barge drilling in Tailrace, monitoring well installations.
Hoechst Celanese Corporation North and South Carolinas	\$2,000,000	Monitoring, extraction, and injection well projects via augers, mud, hammer and core methods, Geoprobe, packer testing.
Barber Orchard Superfund Site Waynesville, North Carolina	\$300,000	Quadruple cased bedrock monitoring wells to 600 feet.
Air Force Plant #6 Marietta, Georgia	\$300,000	Double cased bedrock monitoring wells to 500 feet, coring, packer testing.
Santee Cooper Meteorological Station	\$100,000	Geotechnical borings in soil and rock to 150 feet, three miles offshore for future wind farm.
Confidential Superfund Site Asheville, NC	\$750,000	Double cased 4" bedrock wells to 300 feet, geographical logging, packer testing, coring, DPT
Mine Development Drilling	\$2,000,000+	Core drilling vertically and inclined to 1000 feet in crystalline and karst geology for reserve evaluation.
Moog Components Murphy, NC	\$500,000	Inclined electrode well installation to 100 feet.
Ground Rod Installation South Carolina Statewide	\$1,250,000	Installation and cadwelding of ground rods to 250' in soil and rock.
Seismic Shot Hole Drilling Southeastern U.S.	\$150,000	12" diameter shot hole drilling in soil and rock to 75' in support of deep seismic exploration.
